

Corrosion Resistant Alloys for Pharmaceutical & Bio Synthetic Applications

Alloy 22 has increasingly replaced the use of glass, carbon steel, glass lined or Fluoroshield lined process plant and stainless steel process equipment. AL-6XN® is increasingly being used in the Bio Synthetics market as an upgrade to 316L where the environment does not dictate the use of Alloy 22.

ASSOCIATED ALLOYS:

NICKEL ALLOYS		
Alloy 22	Alloy 625	Alloy C276
TITANIUM ALLOYS		
Titanium Grade 2	---	---
STAINLESS STEELS		
AL-6XN®	Alloy 904L	---
DUPLEX STAINLESS STEELS		
UNS S31803/2205	UNS S32205	UNS S32760
ZERON® 100	---	---

APPLICATIONS:

- Solvent Recovery Plants
- Nutsche Pressure Filters
- Conical Mixers and Driers
- Tray Driers
- Glove Boxes & Containment Vessels
- Centrifuges

PRODUCTS

- Coil
- Flanges
- Pipe Fittings
- Pipe & Tube
- Round Bar
- Sheet & Plate
- Welding Consumables

PROCESSING

- Bar Sawing
- Laser Cutting
- Plate Sawing
- Shearing
- Timesavers®
- Virtek® Laser Inspection
- Waterjet Cutting
